SKILLS & TECHNOLOGIES

- **Skills:** RPA development with UiPath; instructor-led training, enablement, and pair-programming; solution design and architecture; process documentation; web scraping and web automation; databases; machine learning and natural language processing; web API creation and integration; PC repair and service.
- **Technologies:** Programming with Python, VB.NET, C#, and Java; software and web automation using the UiPath software suite, Selenium, and BeautifulSoup; terminals such as Bash and PowerShell; databases using MySQL, SQLite, PostgreSQL, and MongoDB; teleconferencing and presenting using Zoom, Cisco WebEx, Microsoft Teams, and Google Meet.

EXPERIENCE

UiPath Senior RPA Developer (Global Partner Enablement)

December 2021 – Present

- Answered requests for supporting development, estimation, solution design, proofs-of-concept, and best practices from UiPath partners (Deloitte, Accenture, Amitech, Robiquity, Capgemini, etc.)
- Acted as training leader for UiPath Document Understanding and AI Center instructor-led trainings.
- Improved partner enablement course material with new exercises and written documentation.

UiPath RPA Developer II (US Technical Services)

April 2019 – December 2021

- Successful client implementations completed for small-scale pilot projects as well as large-scale team initiatives.
- Acted as an individual developer, trainer, solution designer, and project expert for clients in the healthcare & medical, information technologies, network operations, financial, telecommunications, and energy industries.
- Performed both ad-hoc client code-reviews as well as internal code-reviews of projects built by Technical Services team members for client use.
- Hosted instructor-led trainings on Document Understanding and Advanced RPA Developer course material.
- Founded a Mentors' Circles initiative to give current and prospective mentors from US Technical Services a space to improve and receive feedback on their mentorship ideas and progress.

UiPath RPA Developer (US Technical Services)

December 2018 – April 2019

- Hired initially as a Consultant to assist with the implementation of numerous automated processes for a multinational energy company and its subsidiaries.
- Responsibilities included designing, developing, documenting, and deploying automations with focus in areas of business such as finance, budgeting, and IT.
- Maintained a close working relationship with these regional energy companies and their Centers of Excellence to teach their RPA developers-in-training through pair-programming and modularization exercises.

EDUCATION

Bard College

August 2014 – May 2018

BA, Computer Science with a concentration in Experimental Humanities

Annandale-on-Hudson, NY

- Received the Summer 2016 [Community Action Award](#) from the Bard College [Center for Civic Engagement](#) to develop a virtual tour of [Historic Red Hook's](#) Elmendorph Inn.
- Senior thesis developed and documented over an entire academic year, culminating in a [full report](#).
- Founded the Bard College Minecraft Club.
