SKILLS & TECHNOLOGIES

- **Skills:** Customer-facing software training, enablement, and pair-programming; solution design and architecture; process documentation; web scraping and web automation; databases; machine learning and natural language processing; web API creation and integration; PC repair and service.
- **Technologies:** Programming with Python, VB.NET, C#, and Java; software and web automation using the UiPath software suite, Selenium, and BeautifulSoup; terminals such as Bash and PowerShell; databases using MySQL, SQLite, PostgreSQL, and MongoDB; teleconferencing and presenting using Zoom, Cisco WebEx, Microsoft Teams, and Google Meet.

EXPERIENCE

Manager & Automation Engineer (Systems Integration @ CapTech Ventures, Inc.) **January 2024 – Present**

- Established testing automation infrastructure and resources for clients using UiPath Test Suite and Test Manager.
- Led client automation initiatives including assessment of automation opportunities as well as pair-programming, development, and deployment of automated solutions.

Senior RPA Developer (Technical Partner Enablement @ UiPath, Inc.) **December 2021 – January 2024**

- Supported UiPath partners (consulting firms such as Deloitte, Accenture, Amitech, Robiquity, Capgemini, etc.) with development, cost estimation, solution design, proofs-of-concept, and best practices.
- Improved partner enablement course material with new exercises and written documentation.
- Acted as a training leader for UiPath Document Understanding, AI Center, and Communications Mining instructor-led trainings.

RPA Developer II (Technical Services @ UiPath, Inc.) **April 2019 – December 2021**

- Successful client implementations completed for small-scale pilot projects as well as large-scale team initiatives.
- Acted as an individual developer, trainer, solution designer, and project expert for clients in the healthcare & medical, information technologies, network operations, financial, telecommunications, and energy industries.
- Performed both ad-hoc client code-reviews as well as internal code-reviews of projects built by Technical Services team members for client use.
- Hosted instructor-led trainings on Document Understanding and Advanced RPA Developer course material.
- Founded a Mentors' Circles initiative to give current and prospective mentors from US Technical Services a space to improve and receive feedback on their mentorship ideas and progress.

RPA Developer (Technical Services @ UiPath, Inc.) **November 2018 – April 2019**

- Hired initially as a contractor to assist with the implementation of numerous automated processes for a multinational energy company and its subsidiaries.
- Maintained a close working relationship with these regional energy companies and their Centers of Excellence to teach their RPA developers-in-training through pair-programming and modularization exercises.
- Responsibilities included designing, developing, documenting, and deploying automations with focus in areas of business such as finance, budgeting, and IT.

EDUCATION

Bard College

BA, Computer Science with a concentration in Experimental Humanities

August 2014 – May 2018

Annandale-on-Hudson, NY

Senior thesis: [Don't Take This Personally: Sentiment Analysis for Identification of "Subtweeting" on Twitter](#)
